DETAILED ACTION

Response to Amendment

1. Examiner acknowledges preliminary amendment filed on 7/3/2003.

Claim Objections

2. The claims are objected to because the lines are crowded too closely together, making reading and entry of amendments difficult. Substitute claims with lines one and one-half or double spaced on good quality paper are required. See 37 CFR 1.52(b).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-10 rejected under 35 U.S.C. 103(a) as being unpatentable over Kloba et al (US Patent No 6,553,412) in view of Marcus et al (US Patent No 6,490,601).

Art Unit: 2157

5. In reference to claim 1, Kloba teaches inserting an application program interface the web site for determining the information to be transferred; inserting a user interface in the web site for selecting a plurality of options for transferring the information from the first web site into the handheld Internet appliance (Figure 1 #112, column 10 lines 45-67, column 11 lines 25-55 and column 12 lines 1-40).

Kloba fails to explicitly teach providing a software plug-in to automatically transfer the information from the web site into the local database in the handheld Internet appliance.

However, Marcus teaches providing a software plug-in to automatically transfer the information from the web site into the local database in the handheld Internet appliance (Abstract, column 3 lines 15-55).

It would have been obvious for one of ordinary skill in the art to modify Kloba by adding such a software to a handheld device as per the teachings of Marcus to increase the flexibility and compatibility of the device as the user would not need to remember to manually transfer the information.

- 6. In reference to claim 2, Kloba teaches the method of claim 1, wherein the handheld Internet appliance comprises a wirelessly-enabled personal digital assistant (figure 1V and column 4 lines 63-67).
- 7. In reference to claim 3, Kloba teaches the method of claim 2 wherein the handheld Internet appliance further comprises plurality of local applications, the plurality of local applications comprising:

Application/Control Number: 09/834,380

Art Unit: 2157

an address book application; calendar application; an e-mail application; memo pad application; to-do list application; web browser application; word processing application; and spreadsheet application (Figures 9,11,24 and 27).

- 8. In reference to claim 4, Kloba teaches the method of claim 1 wherein local database stores a plurality of data records representing information entered by the user when interacting with a local application in the handheld Internet appliance (Figure 1A #146, figure 1AA, column 4 lines 50-67, column 6 lines 1-15 and column 26 lines 40-60).
- 9. In reference to claim 5, Kloba teaches the method of claim 1 wherein inserting the user interface in the web site comprises inserting a button in the web site, the button comprising a menu displaying menu options for transferring the information from the web site into the handheld Internet appliance (Figures 6,8 and 10).
- 10. In reference to claim 6, Kloba teaches the method of claim 5 wherein the menu options comprise:

an option saving the information from an already open web site into a local application; and plurality of options for launching a second web site displaying content associated with the information from the already open web site (Figure 11 and column 9 lines 15-60).

- 11. In reference to claim 7, Kloba teaches the method of claim 6, wherein the local application comprises the address book application and the option for saving the information from the web site comprises saving an address from the web site into the address book application (Figure 11 and column 15 lines 40-67).
- 12. In reference to claim 8, Kloba teaches the method of claim 6, launching a second web site to map an address displayed on an already open web site; launching a second web site to find

Art Unit: 2157

driving directions to the address displayed on the already open web site; and launching a second web site to find commercial locations nearest the address displayed the already open web site (Figure 1A #146, figure 1AA, column 4 lines 50-67, column 5 lines 1-45, column 6 lines 1-15 and column 26 lines 40-60).

- 13. In reference to claim 9, Kloba teaches the method of claim 1, formatting the information to be saved according to the local database which the information is going to be transferred; loading the formatted information into the local database in the handheld Internet appliance; and replacing parameters associated with the information on the second web site's URL (column 4 lines 15-60, column 9 lines 15-60, column 26 lines 30-67, column 27 lines 1-50 and column 32 lines 5-45).
- 14. In reference to claim 10, Kloba teaches the method of claim 9, launching a web site from the first application; and automatically filling on-line forms a web site with a data record stored in the local database handheld Internet appliance (column 4 lines 15-60, column 9 lines 15-60, column 26 lines 30-67, column 27 lines 1-50 and column 32 lines 5-45).
- 15. Claims 11-30 do not teach or define any new limitations above claims 1-10 as mentioned above and are therefore rejected for similar reasons.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramy M Osman whose telephone number is (703) 305-8050. The examiner can normally be reached on M-F 9-5.

Art Unit: 2157

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (703) 308-7562. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
